

### **REMARKS**

Figure 4 is being submitted to clarify references in the specification of an equivalent circuit for the resonant rod detailed in the present Application. Figure 4 is merely a visual representation of the circuit that is explicitly described in the originally filed Detailed Description in paragraphs [0047] – [0050]. The described circuit contains components well known in the art, such that one skilled in the art would have ample information from the Detailed Description to construct the circuit without this visual aid. Figure 4 does not disclose any information not described in the originally filed Application and makes no changes to the scope thereof. Applicants therefore suggest addition of Figure 4 in this Preliminary Amendment.

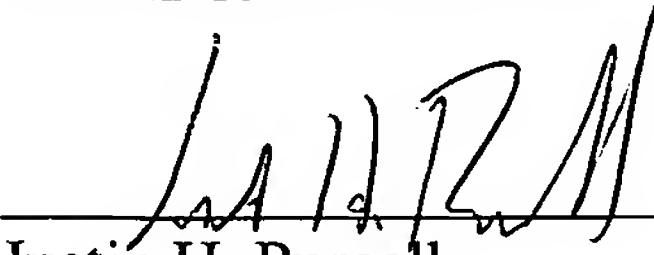

Figure 4 will, as is well known, expedite understanding of the Application because one skilled in the art reviewing the Application will, most likely, be required to visually reconstruct the circuit from the Detailed Description. Therefore, by providing this visual representation, time may be saved in the Examination process. Applicants therefore believe Figure 4 should be added to the present Application in response to this Preliminary Amendment.

Please charge any fees required in the filing of this amendment to Deposit Account 50-0476.

If the Examiner should have any questions he/she is urged to contact the undersigned at (248) 223-9500.

Respectfully Submitted,

**ARTZ & ARTZ P.C.**
